Manufacturing in China

Two software branches for self-service devices

Classic application (winatm)

- Low resource requirements
- Extensive functionality
- Limited visualization capabilities
- No longer under active development, but still maintained

Stability and reliability
on the legacy device fleet

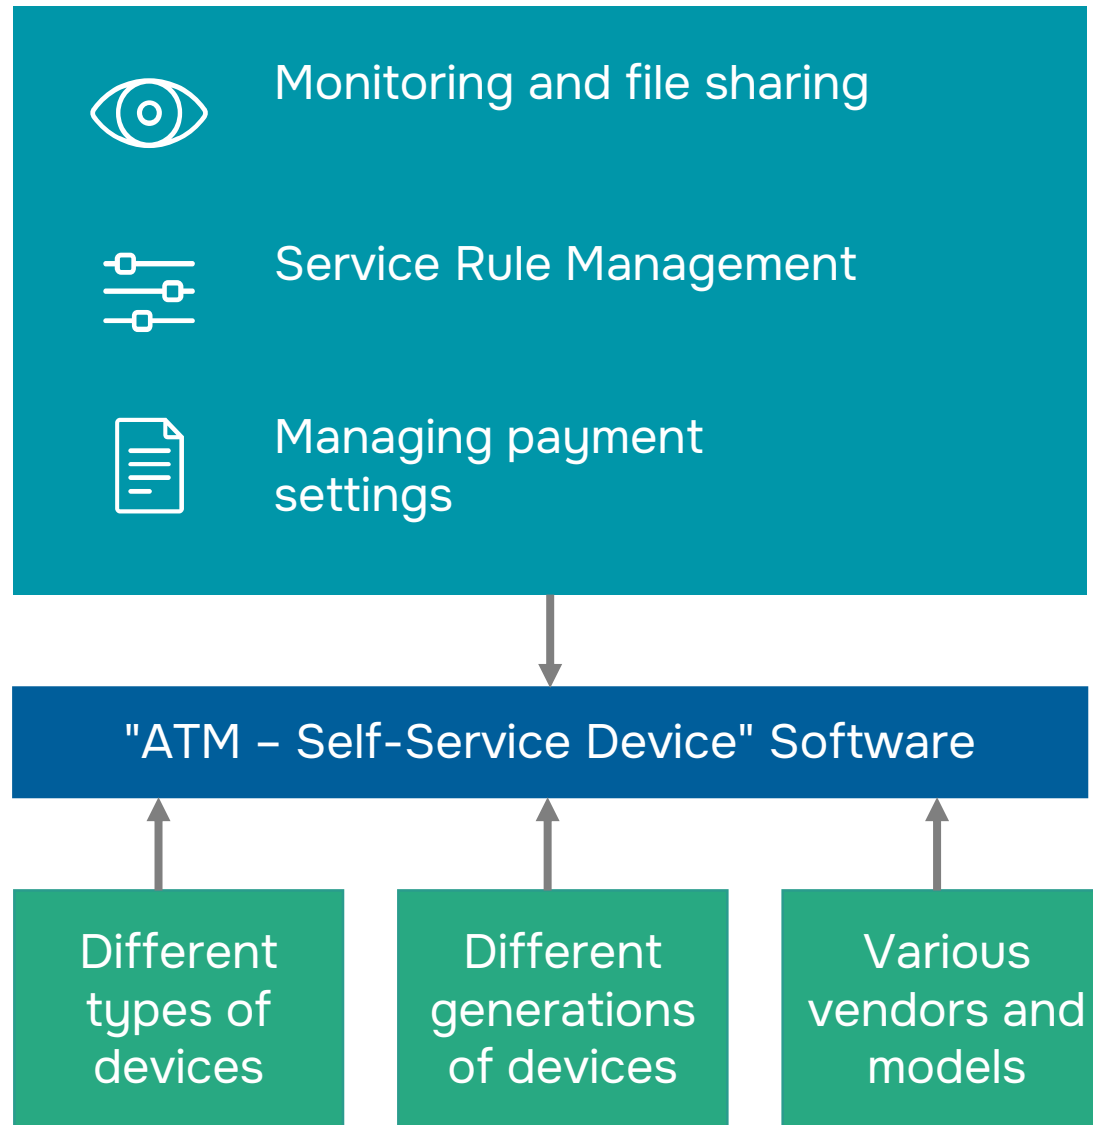

New application (ngapp)

- Designed for modern ATMs
- Extensive functionality
- Unlimited visualization capabilities
- Actively supported and developed

Unlocking the potential
of modern devices

Efficient network operation

- Unified management
- Flexible scaling
- Seamless migration

"POS Terminal / Cash Disbursement Point" Software

Functionality of the "POS Terminal / Cash Disbursement Point" Software

POS

- Purchase, refund, cancellation
- Pre-authorization
- Payment with cashback
- Integration with POS systems

Cash Disbursement Point

- Cash withdrawal
- Cash deposit
- Balance inquiry
- Change PIN

card

QR-code

NFC

Compatibility with various terminal models
